Product Retirement Announcement
1151AUS Conventional Ionisation Smoke Detector

Dear Customer,

Due to having exhausted our remaining supplies of parts for this model, we hereby announce the immediate retirement of the **1151AUS** Conventional Ionisation Smoke Detector.

Unfortunately we are no longer able to source some of the critical parts required to manufacture this model, so we have been forced to discontinue this model.

At this time there is no direct replacement ionization model available, however the 2151BAUS photoelectric smoke detector can be used to replace the 1151AUS for the majority of applications.

Should you require any additional information regarding this statement please feel free to contact the undersigned.

Yours faithfully,

A handwritten signature in black ink, appearing to read "Philip Bush", followed by a period.
