

November 28, 2005

Dear Valued Customer,

Notifier Inertia is discontinuing several fire alarm control panels that were, in some cases, introduced more than a decade ago. While these have been very successful product offerings, new Australian standards and more up-to-date alternatives force us to announce their discontinuance.

The discontinued products are:

<b>Product</b>	<b>Suggested Substitute</b>
IFS-2400 FIP	IFS-2600
IFS-008 FIP	IFS-888

It is our intention to manufacture and stock repair boards (RBs) for the discontinued panels until the cost of circuit board components is prohibitive or piece part components become obsolete. Please contact your Regional Sales Manager or Technical Support if you have any questions regarding this notice.

Sincerely,

A handwritten signature in black ink, appearing to read 'A. Azizi'.

Arya Azizi  
Director of Engineering
