

Date: 5th April, 2007

Affected Products: AFP-200 1 Loop Fire Alarm Control Panel
 NCA Network control annunciator
 LCD-80TM Terminal mode mimic annunciator

Dear Valued Customer,

Notifier Inertia is discontinuing several products that were, in some cases, introduced more than a decade ago. While these have been very successful product offerings, new standards and more up-to-date alternatives force us to announce their discontinuance. The discontinued products are:

Product	Suggested Substitute
AFP-200	AFP-2800
LCD-80TM	LCD-80
NCA	NCA-2

It is our intention to manufacture and stock repair boards (RBs) for the discontinued products until the cost of circuit board components are prohibitive or piece part components become obsolete. Please contact your Regional Sales Manager or Technical Support if you have any questions regarding this notice.

Sincerely,

James Edwards
Product Manager
