

Date: 15 March 2010

Affected Products: FSC-851AUS – IntelliQuad FlashScan Multi-criteria detector

Notifier is pleased to announce the release of the FSC-851 IntelliQuad multi-criteria addressable sensor. This new FlashScan protocol detector combines, independent carbon monoxide, photoelectric smoke, thermal and infra-red detectors, all managed by an embedded microprocessor running a set of very sophisticated and responsive algorithms.

Through the use of its individual sensor outputs and algorithms the IntelliQuad provides a solution which is both ultra-immune to non-fires and yet very sensitive to fires.

The IntelliQuad FlashScan multi-criteria detector requires the following software versions to function correctly;

- AFP-2800 firmware v5.03.02 or above
- AFP-2800 PCI v5.03.02 or above
- LCM software v3.00 or above

Ordering Information:

Part #	Description	Trade Price
FG-03-002	FSC-851 – IntelliQuad Multi-criteria detector (CO, Photo-optical, Thermal, Infra-Red)	\$250
