

Date: 28th March, 2008

Affected Products: 8025 – FFT-7S Fire Fighters Telephone System

Dear Valued Customer,

Notifier Inertia is discontinuing the Fire Fighters Telephone System from sale. While this has been a successful product offering, discontinued supply has forced us to announce this action.

Although no direct replacement will exist at present we recommend the use of the I-2000 EWIS panel where warden or fire-fighter communication is required.

It is our intention to stock replacement components for the discontinued products until piece parts become obsolete.

Please contact your regional sales manager, technical support or myself if you have any questions.

Sincerely,

James Edwards
Product Manager
